HERE Location Services is modular, offering services through Maps, Geocoder, Traffic, Transit, Routing, Geovisualization and Places components and allowing you to pick and choose what you need. APIs make deployment of differentiated location experiences fast and easy. A global, highly responsive and scalable infrastructure supports service delivery.

**Geocoder**

**Accurate geocoding and reverse geocoding**
- Geocoding supporting address range and point addressing
- Fuzzy search for incomplete address queries
- Reverse geocoding to translate coordinates into addresses
- Batch geocoding for processing large databases

**Routing**

**Always-accurate vehicle commercial routing**
- Traffic-enabled routing w/ real-time and/or historical traffic data
- Routing modes for vehicle, truck, pedestrian & public transit
- Isoline and matrix routing

**Maps**

**Powerful services based on the world’s best map**
- Fast map display performance & tile rendering
- Map views including fleet & satellite imagery
- Detailed views (e.g. industrialized parks, venues)

**Places**

**Reliable search and discovery of places**
- Search and discovery of places by category or distance
- Rich places information (e.g. open hours, reviews and ratings)

**Traffic**

**Traffic data for more efficient road networks**
- Traffic tiles w/ real-time and historical flow
- Incidents layer w/ location, type and event information
- Traffic flow data in XML or JSON format
- Traffic flow availability for specified areas

**Transit**

**Door-to-door transit experience**
- Route directions w/ ETAs based on transit schedules
- Route options for various transit modes (e.g. bus, train, subway)
- Transit schedules using timetables and frequency-based schedules
- Pedestrian routing to transit stations
- Seamless connectivity between travel modes and pedestrian access points

Only HERE Location Services delivers powerful, flexible and global location cloud services built on enterprise-grade map data. Discover how HERE can help your business run smarter, faster and more efficiently. Today, leading enterprise organizations around the world use HERE Location Services in hundreds of customer applications and support core business processes such as fleet management, telematics, geomarketing, business intelligence, field force optimization and more.
